- Curtis Bray (MW)
- Laura Cameron (Super Approver)
- Allison Mitchell (CR super approver)
- Alex Alfieri (DB architect)
- Hampton Sublett (MW)

Update as of July 15th, 2009

On July 13th, the Online Directory team successfully deployed the following bug fixes and enhancements identified in our meeting in April.

1. WP-333 - Change "View Next Listing" function to always show the preceding listing instead of going back to the first unapproved listing
2. WP-387 - Don't allow leading/trailing whitespace in data
3. WP-746 - Publish Flags Reported not saving correctly
4. WP-642 - Print Preview report should only show listing units with people in them
5. WP-548 - Javascript Warning on CSS Load of UNDERLINE property Major (3)
6. WP-706 - Remove erroneous index page
7. WP-938 - Update personal information text with link to WarnMe
8. WP-865 - CASify Online Directory
9. WP-870 - Department List Refresh Query Must Accommodate Deleted Depts
10. WP-541 - Listing Update page Help links should open in a new window
11. WP-864 - Misspelling in QA interface
12. New version of web logic - 10.3
13. New server virtualization service conversion - Data Center

Current Top Priority Enhancements *Next Release*

These enhancements were identified in the last prioritization meeting. Let's review and ensure that these items reflect our current objectives for the application.

1.3.1

1. WP-595 - Highlight what has changed on a listing that was submitted to be approved
2. WP-481 - Add proxy functionality to Find/Replace Approver page
3. WP-452 - Convert Assign Approvers tool to Java Platform
4. WP-434 - Convert View Approvers tool to Java Platform
